TECHNICAL PROJECTS

SHREDDA - MOBILE APP | FULL STACK DEVELOPER | GITHUB

- Group project where we built a mobile application from scratch, with the goal of connecting users through their shared interests.
- Implemented features such as: users could swipe left or right to 'like' or dislike' other users and potentially match with them; real time chatting; users could host/post events that others could add to their calendar; cloud-based data management.
- **Technologies used:** Javascript, Firebase/Firestore, React Native/Expo, APIs for calendar, image uploading, location

READY TO ROOMBA | FULL STACK DEVELOPER | GITHUB | HEROKU

- Developed, designed, launched, and deployed an e-commerce website over the course of 2 weeks.
- Implemented Stripe API for checkout and managed databases for new and existing users and products.
- **Technologies used:** PostgreSQL databases, Node, Javascript, React/Redux, Git, Github, Stripe, React Bootstrap.

PRICE TRACKER | SOLE DEVELOPER | GITHUB

- Created an application that tracks prices on websites that are rendered using front-end frameworks or Javascript.
- Currently, those websites are Amazon, BestBuy, and Coinbase for cryptocurrency price tracking.
- **Technologies used:** Nightmare and Puppeteer for web scraping; Cron job for running my node at a scheduled time for price tracking; Nodemailer for sending email notification whenever the price of the item drops below a specified number.
